Safe handling of diisocyanates

Mandatory training for industrial and professional users of diisocyanates

To ensure that workers across the EU can continue to handle diisocyanates safely, new training requirements are now mandatory under the European REACH Regulation. Companies have to train their employees before **24 August 2023**.

FSK Qualified Training Program

The FSK conducts the training courses according to your specific needs: Web-based, on-site or hybrid training. The training contents have already been developed together with the manufacturers and importers of diisocyanates in cooperation with downstream users and distributors. They will soon also be available in your language.
